AGENCY CONTACT MEMORANDUM

To: Commonwealth Technology Council, Technical Contacts

From: Jim Barnhart, Deputy Commissioner
Robin Morley, Deputy Commissioner
Commonwealth Office of Technology

Date: March 16, 2009

Subject: Enterprise standards resource update

In an effort to better serve our customers and more clearly define enterprise information technology standards, Commonwealth Office of Technology, in conjunction with the organization's Enterprise Architecture Standards Committee, would like to announce a more user friendly resource to help define IT product and service recommendations.

The EASC has condensed its standards collection into 10 domain summaries containing all 104 standards categories in a more manageable format. Previously, the resource offered only full standards for each category, many of which were confusing and up to three or more pages in length.

These Summarized statements make it easier for our customers and vendors to quickly find the most up to date information pertinent to their needs. Outdated versions of these summaries are now inaccessible.

Effective immediately, all Enterprise Standards Domain Summaries are available via the following links:

GotSource: <http://gotsource.ky.gov/docushare/dsweb/View/Collection-76229>

Web: http://technology.ky.gov/epmo/stds_overview.htm

What you should do:

- Web Editors should redirect any hyperlinks to the domains listed above.
- Change your Bookmark in your browser.
- If you have printed the standards, please ensure your hard copy is in the latest version.
- Check the web site often (at minimum monthly) for updates and changes to these standards.
- Notify customers and clients who may reference these standards of the changes.

If you have any questions about this new resource, please contact Lorraine Moore (Lorraine.Moore@ky.gov) in COT's Office of Enterprise Technology, Division of IT Governance.
